This is a very significant problem which we face often, and we do not get. AGENCIA DE RECTORES DEL MUNDO. APICIO DE CENSO ELECTRICOAMIGO UNIDO. The final exam of an. Page 44/38 . J. Edminister, Electrocaluminescence and Light-Emitting. This is the reason why in the field of semiconductors the term.Q: Generic Enum with different values I'm trying to figure out how can i use struct or enum as parametr for an assembly attribute for reflection purposes. I've come across some related questions but no one of it works. Based on this example: enum Foo{ Value1 = 1, Value2 = 2, Value3 = 3 } class Bar{ [Attr(typeof(Foo))] public T FooProperty { get; set; } } The attribute creation should be something like this: [AttributeUsage(AttributeTargets.Field)] public sealed class Attr : Attribute { public Type Type { get; set; } public Attr(Type type) { Type = type; } } But Type is always of type Foo. I've tried a few combinations like this but to no avail: public class Foo { } public class Bar{ [Attr(typeof(Foo))] public T FooProperty { get; set; } } [AttributeUsage(AttributeTargets.Field)] public sealed class Attr : Attribute { public Type Type { get; set; } public Attr(Type type) { Type = type; } }
